Product Facts: (continued)

For use with dogs and cats

Pet Enzymes Plus® is recommended for joint support while supporting normal flexibility and helps maintain a normal inflammatory response. Can be used for post exercise recovery and occasional muscle soreness. Connective tissue support. Eases joint stiffness due to normal daily exercise and activity. Pet Enzymes Plus® will help breakdown and digest potential allergens such as tree, grass or weed pollens, flea bite saliva, dander, mold spores, dust and dust mite feces and certain food allergens. Supports pets with seasonal allergies.

Directions for use:

Use one chewable tablet twice a day for pets less than 40 pounds. Use two chewable tablets twice a day for pets over 40 pounds. Always give to your pet between meals with no food for best results. For faster results, double the amount given until desired results are achieved and then reduce to regular number of recommended tablets a day.

Warnings: For animal use only. Keep out of reach of children and animals. In case of accidental overdose, contact a health professional immediately.
